

## Cycle parking: Why? Where? How much? What kind?

### Course description

Through examples from a range of different cities, this course will help you look at your own local context critically and answer the questions, "What is the value of good cycle parking?" and "How can an integrated bicycle parking policy help to increase cycling in my city?" and finally, "How can we start to achieve this in my city?"

### Target audience

Those in cities in the relatively early stages of developing cycling as a mode of transport. A strong background in cycling infrastructure is not needed

### Thematic area

Non-motorised transport
