

## Congestion and Your City: The FLOW Approach

### Course description

The webinar and e-course introduce participants to the FLOW project's philosophy on congestion and congestion reduction through walking and cycling measures. They look at the FLOW conceptual framework and the role of walking and cycling in congestion reduction, the FLOW Handbook on Indicators that measure congestion reduction in the context of walking and cycling and the FLOW portfolio of walking and cycling measures relevant for congestion reduction. A concrete example of the application of FLOW tools in the context of College Green in Dublin is demonstrated.

### Target audience

Transport planners in local authorities and consultancies, recent graduates, other multipliers

### Thematic area

Non-motorised transport & Transport modelling
